

10.

→ → Server

The screenshot shows the configuration interface for a server. The top navigation bar includes links for '狀態', '活動', '備份', '日志', '統計', and '設定'. Below this, there are tabs for '一般', '郵件', 'LDAP/AD', '用戶', and '用戶端'. The '用戶端' tab is selected, and a '+ Add new group' button is visible. The main content area is titled 'Server' and contains various configuration options:

- Backup storage path: /storage/backup
- Server URL: (empty)
- Do not do image backups: (highlighted in red)
- Do not do file backups: (highlighted in red)
- Automatically shut down server:
- Download client from update server:
- Show when a new server version is available:
- Autoupdate clients:
- Max simultaneous backups: 3
- Max recently active clients: 10000
- Cleanup time window: 1-7/3-4
- Automatically backup UrBackup database:
- Total max backup speed for local network: - MBit/s
- Global soft filesystem quota: 95%
