- Voolume level backup

 New Backup Job

Backup Mode
Choose what data you want to back up from this computer.

Name

Backup Mode

Volumes

Destination

Local Storage

Schedule

Summary

☐ **Entire computer (recommended)**
Back up your entire computer image for fast recovery on any level. Deleted, temporary and page files are automatically excluded from the image to reduce the backup size.
☐ Include external USB drives

☒ **Volume level backup**
Back up images of selected volumes, for example only data volumes. Deleted, temporary and page files are automatically excluded from the image to reduce the backup size.

☐ **File level backup (slower)**
Back up individual files and folders by mask. This mode produces an image-based backup with only selected files included in the image.

Shared Folder

Schedule

Summary

☐ **Local storage**
Choose this option to back up to a locally attached storage device such as USB, Firewire or eSATA external hard drive. Backing up to internal hard drives is not recommended.

☒ **Shared folder**
Choose this option to back up to an SMB (CIFS) share on a Network Attached Storage (NAS) device, or on a regular file server.

☐ **Veeam backup repository**
Choose this option to back up to a backup repository managed by Veeam Backup & Replication 11 or later server.

☐ **Microsoft OneDrive**
Choose this option to back up to the Microsoft OneDrive or Microsoft OneDrive for Business.
